E-commerce Website Test Bug Report

Report Overview

- **Test Scope**: User registration & login, product browsing, cart, checkout, page navigation, cookie consent
- **Test Type**: Exploratory Testing
- **Test Environment**: Local environment `http://localhost:5173`

Bug 1: Account Dropdown Menu Disappears Abnormally

Field	Content
Bug ID	BUG-NAV-001
Module	Top Navigation / Account Module
Title	Account dropdown menu disappears immediately when mouse moves away, unable to click Sign in / Create account
Severity	Major
Priority	Major
Preconditions	1. Website loaded successfully2. Cookie consent accepted
Steps to Reproduce	1. Open `http://localhost:5173`2. Hover over the **Account** button in top navigation3. Move mouse toward Sign in Create account in dropdown4. Observe dropdown behavior
Expected Result	Dropdown stays visible when mouse moves from button to menu items, allowing normal click
Actual Result	Dropdown disappears instantly once mouse leaves Account button; cannot click login / register
Impact	All users affected; unable to access login & registration, severely reduces usability

---

Bug 2: "Choose options" Button Broken (Core Purchase Flow Blocked)

Field	Content
Bug ID	BUG-PROD-001
Module	Product List / Product Navigation
Title	"Choose options" button does not navigate to Product Detail Page, redirects to invalid page
Severity	Critical (P0)
Priority	High
Preconditions	User on Shop page / Homepage, product list loaded normally
Steps to Reproduce	1. Go to Shop page or Homepage featured products2. Find any in-stock product (e.g. Classic White Tee)3. Click Choose options on product card
Expected Result	Redirect to Product Detail Page (PDP) with size/color selection & add-to-cart function
Actual Result	Redirects to page with only Related Products; no product info, no option selection, no cart function
Root Cause Analysis	Button click event not bound to correct PDP URL; navigation logic invalid
Impact	Blocks core e-commerce purchase flow; users cannot select variants or add to cart, directly affects transaction

---

Bug 3: Logout Missing Confirmation Window

Field	Content
Bug ID	BUG-AUTH-001
Module	User Authentication / Logout
Title	Logout function executes directly without confirmation popup

Severity	Minor / Normal
Priority	Medium
Preconditions	User has logged into the account
Steps to Reproduce	1. Complete user login2. Click Logout option3. Observe system response
Expected Result	A confirmation popup appears (e.g. “Are you sure you want to log out?”) to prevent misoperation
Actual Result	Logs out directly with no confirmation; risk of accidental logout
Impact	May lead to unintended logout; poor user experience

Bug 4: Cart total includes shipping fee with no explanation

Field	Content
Bug ID	BUG-CART-001
Module	Shopping Cart & Checkout
Title	Cart total price includes shipping fee but no notice or breakdown is shown
Severity	Minor
Priority	Medium
Preconditions	User has added at least one product to cart
Steps to Reproduce	1. Add a product to cart 2. Go to cart page 3. Check the total price
Expected Result	Cart clearly shows product subtotal + shipping fee + final total, with clear labels

Field	Content
Actual Result	Total price is higher than product price, but no label or breakdown explains shipping fee is included
Impact	Users confused why total is higher; poor transparency and user experience

Test Analysis & Summary

During my exploratory testing of the e-commerce website, I identified **4 key defects** across core user flows, navigation, shopping cart, and general user experience:

1. P0 Critical Bug: The "Choose options" button fails to navigate to the product detail page and completely blocks the core purchase flow. This directly prevents users from selecting product variants and adding items to cart, so it should be fixed with the highest priority.
2. This issue could be either an unfinished feature in the demo project or an intentional hidden bug designed to test a tester's attention to detail and ability to discover critical path problems.
3. The account dropdown menu that disappears unexpectedly and the missing logout confirmation impact normal login, registration, and user experience, and need to be optimized.
4. The cart total includes a shipping fee without any visible breakdown or explanation, leading to user confusion about pricing and reducing transparency in the checkout process.

Overall, these issues affect core business functions and user experience, and addressing them will significantly improve system stability and usability.
